

Strengthen joint practice and action towards early identification and safe referral to trauma-informed care for victims of trafficking (VoTs) within the context of asylum procedures, in line with EU standards.

Joint **multisectoral capacities** of front-line service providers to **identify and safely refer** TCN VoTs engaged in asylum procedures are improved.

- 50 front-line organisations have access to TIATAS tools and/or guidelines
- 75% of surveyed front-line staff report that TIATAS tools / guidelines improve their identification and referral practices
- 544 front-line staff take part in training and capacity development events
- 75% of surveyed front-line staff report increased knowledge and skills for identification and referral of VoTs in the context of asylum

Access to **rights and support services** for VoTs, asylum seekers, refugees and migrants at risk of trafficking in the context of asylum improved.

- 195 Individual risk and needs assessments carried out
- 193 Local/regional/national referrals to appropriate services made or received by TIATAS partners
- 77 Transnational (cross-border) referrals to appropriate services made or received by TIATAS partners
- 85% of surveyed (potential) VoTs in the context of asylum report that they gained and can apply knowledge regarding their rights
- 6000 asylum seekers, refugees and migrants reached with information on VoT rights and anti-trafficking awareness raising materials

Decision/Policy makers are informed of **best practices** and learnings on early identification and safe referral of VoTs in the context of asylum.

- 120 decision and/or policy makers reached with TIATAS materials (national and EU level) on early identification and safe referral of VoTs
- 7 documented best practices and lessons learnt on early identification and safe referral of VoTs
- 70 % of surveyed decision and/or policy makers reached with TIATAS materials (national and EU level) report to have deeper understanding of AT challenges in the context of asylum and how to address them through policy decisions

TIATAS: Main Outcomes

Further outcomes

Project not limited to these outcomes

Evidence, best practices, and lessons learnt

At least **120 decision and policy makers** receive **evidence, best practices, and lessons learnt**, highlighting contextual challenges of implementing the EU AT Directive in the context of asylum systems.

Appropriate, trauma-informed referrals

Approximately 193 VoTs are referred to appropriate, trauma-informed services locally, in line with their individual needs, and **approximately 77 VoTs** are referred to services in another EU MS (transnationally).

Trainings and Workshops

544 front-line staff from state and civil society operators take part in trainings or workshops

TIATAS tools, guidelines and resources

Over **50 front-line organisations** have access to TIATAS tools, guidelines and resources

Needs and Risks assessments

Approximately **195 individual needs and risks assessments** are carried out for VoTs among TCNs in the context of asylum
